

# CDC: IMPROVING HEALTH IN HAITI

CDC is working with the Haitian Ministry of Public Health and Population and partners to develop and implement data driven programs that improve the public health system in Haiti.

## Building the Public Health Workforce

**313**  
Disease  
Detectives  
Trained

**250**  
Rural Water &  
Sanitation  
Technicians Trained

## ADDRESSING PUBLIC HEALTH PRIORITIES

CDC is supporting efforts to eliminate cholera transmission, achieve epidemic control of HIV/AIDS, and expand enhanced Tuberculosis (TB) and multidrug-resistant Tuberculosis (MDR-TB) diagnostics

99% reduction  
in suspected  
cholera cases  
since 2011

Over 100,000  
patients  
enrolled on  
live-saving HIV  
treatment

Increasing  
number of TB  
and MDR-TB  
cases detected  
and treated  
annually

## STRENGTHENING HEALTH SECURITY

Preventing, detecting, and  
responding to potential  
disease outbreaks using  
improved surveillance data

Increasing access to clean  
water and sanitation at  
the commune and  
national levels

Improving laboratory  
capacity to test for  
significant pathogens

Working to eliminate key  
infectious diseases like  
rabies, malaria and  
lymphatic filariasis
